# Brand New Ideas for Your Kitchen

Customize the look of your LG refrigerator like never before. With the latest update, you can now upload a personal photo or design to display on the front of your fridge.

If you prefer a solid color, the LG app offers a stunning range of 60 hues to choose from, allowing you to match your refrigerator seamlessly with your kitchen décor.

# Samsung Bespoke FamilyHub Refrigerator

8

The latest Samsung Bespoke FamilyHub refrigerator, available in 2024, will be able to display photos on its front panel.

Instead of displaying a stainless front, you could decorate your refrigerator with things you love, such as pictures of your family, memories of your last vacation, or a bottle of wine.

# Refrigerator Technology

Many refrigerators have two evaporators or compressors to keep the warmer air of the refrigerator from commingling with the frozen air of the freezer.

A few have ethylene filters to prevent gasses from spoiling foods to contaminate other foods in your refrigerator.

We tested different refrigerators with fruit and vegetables over four weeks. You can see the results by clicking the link below.

You can now buy a refrigerator with different types of ice cubes.

LG has their slow dissolving Craft Ice idea for fine spirits and cocktails.

What's New?

# New Finishes

You have several options for a custom look or color. For example, a True refrigerator offers 14 finishes, six hinge options, and glass doors for a modern look. BlueStar has 1,000 color options to choose from.

Café Appliances offers five finishes and four handle options for a personalized touch at a lower cost.

# Ice Makers Problems

While refrigerators have become more efficient, they are also more prone to failure.

One common issue with French door counter-depth refrigerators is their ice makers, which can cause leaks.

Sending a frozen cube through a French-door refrigerator is still an issue.

Over time, impurities in water can build up in an ice maker, reducing water flow and scaling up on integral components

## Counter-Depth Refrigerators

# What is Regular counter-depth?

Regular counter-depth is quite simply a shallow refrigerator. It is also much less expensive than the professional or integrated types.

A regular counter-depth is available in many different configurations such as bottom freezer, side-by-side, and French door typically between 20 to 26.5 Cu. Ft. capacity.

The refrigerator should be purchased in stainless steel. Because the door on the refrigerator is so thick, panels do not look sharp on this unit.

**Widths:** 24", 30", 33" and 36"

**Brands:** LG Studio, Bosch, GE, KitchenAid, Whirlpool, Samsung, LG, Electrolux, SKS, Blomberg, Fisher & Paykel, Maytag, and Frigidaire

**Price:** \$1,700 - \$3,800

# Side-by-Side Refrigerators

Side-by-side refrigerators used to be the standard luxury style until French-door refrigerators became more popular.

Side-by-side refrigerators have made a minor comeback because of the larger freezer space.

# French Door Refrigerators

A French door is a side-by-side refrigerator with a pull-out bottom freezer.

It has proportionally more refrigerator space and has better lateral storage for bigger trays and platters.

Many French door refrigerators have a door within the door to easily access milk, juice, and condiments.

**The Best Counter-Depth Refrigerators**

# Double Drawer French Door Refrigerators

to the French door, just with another drawer, and is the newest refrigerator style available.

The second drawer will be either freezer or refrigerator depending on the brand.

The best-selling counter-depth refrigerator brands are Samsung, GE, and LG.

# 4-Door Refrigerators

You can buy many four-door refrigerators in many brands like Samsung, LG, Beko, Whirlpool, and Haier.

You can choose refrigerator or freezer in the right-hand freezer compartment and swap as needed.

# Bottom Mount

Bottom mount counter-depth refrigerators have been replaced with the French door style. It's still a popular option for professional refrigeration.

Available in larger capacities and easy access to fruits and vegetables are the main benefits.

# Side-by-Side vs. French Door

French doors currently outsell side-by-sides and other bottom mounts by about 15 to 1. Better refrigeration space and a trendy appearance would be the main reasons. However, side-by-side refrigerators have more freezer space.

# What is Professional counter-depth?

Professional counter-depths are characterized by their restaurant appearance and 84" height with the compressors on the top of the unit.

The Pro looks good in stainless or can be covered with custom panels.

**Widths:** 30", 36", 42" and 48". 36" is the most popular size.

**Brands:** Sub-Zero, Monogram, Viking, BlueStar, JennAir, and KitchenAid

**Price:** \$6,000 to \$15,000.

# Sub-Zero

Sub-Zero was the first counter-depth manufacturer with features like a vacuum seal to lock air out of the refrigerator and two compressors to manage temperature consistently.

The crispers are also magnetic, keeping the right temperature and humidity for fruits and veggies.

Sub-Zero is the only refrigerator with an ethylene scrubber to reduce food spoilage.

Last year, their new split climate system guaranteed better temperature and humidity control in the crispers.

True is the largest family-owned commercial refrigeration company based in St Louis.

Most of the components are made by True in their 1,000,000-square-foot factory.

True is a solid refrigerator in all stainless with heavy glass bins.

True offers 14 color options and six hinge styles for a unique kitchen look, but custom panel fronts are not available for True refrigerators.

# BlueStar

BlueStar is another American, family-owned company based in Pennsylvania.

All BlueStar refrigerators are solid metal and are designed to fit a commercial cookie sheet.

BlueStar has 1,000 colors and ten trims to choose from in a BlueStar refrigerator.

Viking is the other marquee name in professional refrigerators. 15 years ago they bought the tooling to build refrigeration from Amana.

The early Viking products were problematic, and they have struggled to improve quality recently. In 2013, Viking was purchased by Middleby Corp.

Viking has its “Plasmacluster” which uses ions to kill bacteria and mold inside the fridge and also features a 3-year warranty.

# JennAir

JennAir is the upscale appliance division of Whirlpool Corp. They have pumped \$300 million into this brand over the last several years, all in cooking.

They have become incredibly promotional with their refrigerators, giving away dishwashers and rebates with qualifying purchases.

Their best piece is the 42” French door, pictured left.

# Integrated Counter-Depth

---

# What Is Integrated Counter-Depth Refrigerator?

An integrated refrigerator fits flush the cabinet and becomes indistinguishable from the cabinet itself. This style needs a minimum of 25" depth.

In contrast, both the doors of regular cabinet depth and professional counter-depth will protrude outside the cabinet.

Although you can buy stainless inserts, the integrated looks best with custom panels.

**Widths:** 18", 24", 27", 30" and 36".

**Brands:** Thermador, Gaggenau, Sub-Zero, Miele, Liebherr, JennAir, and Bosch.

**Price:** \$5,000 to \$12,000 (but you may need two units).

# Integrated: Columns vs. Regular

vs

## Regular

You can buy a regular unit with refrigerator and freezer, typically at 30" and 36" widths.

## Columns

Columns, or separate all freezers and all refrigerators, can be purchased at 18", 24", and 30" widths. You would typically buy two columns to complete a kitchen.

# Thermador / Bosch / Gaggenau

These three brands are part of the BSH appliance group.

Thermador has the most variety with columns and the only French door integrated at 36" wide.

They also have new stainless-steel interiors, shelving, and better filters.

Gaggenau has stainless on the inside and is more expensive.

The Bosch label is less expensive and more limited in selection.

This group sells the most integrated refrigerators because they were first to aggressively market columns and market rebates to the customer.

# Sub-Zero

Sub-Zero has launched a new series of built-in refrigerators in different sizes ranging from 18” to 36”.

The new series comes with air purification, filtering, and internal water dispensing, similar to the professional series.

Their new touch screen control panel will maintain temperature to less than 1 degree of setting.

They have integrated air and water purifying systems in their refrigerators as well.

The shelving is coated with nanotechnology to stop spills from spreading.

# Miele

Miele is another family-owned company. Miele is like Bosch and Thermador. The product is a joint venture between Miele and BSH.

However, Miele adds different lighting, controls, and the MasterChef temperature system for maintaining fruits and vegetables.

# JennAir

JennAir was the first with Wi-Fi and now offers the most zones of cooling with three zones in the refrigerator and two in the freezer.

# Signature Kitchen Suite (SKS)

SKS is the premium brand of LG. It features the largest capacity for integrated refrigerators.

Check out their 48-inch or 36-inch refrigerators with multiple drawers for a unique design.

# Fisher & Paykel

Fisher & Paykel offers a range of affordable 36-inch integrated refrigerators.

ActiveSmart technology is their hallmark, with sensors and a microprocessor ensuring even temperatures.

# HOW TO BUY

Choosing between these products can be difficult, but you can't go wrong if you choose what you'll use

# How to Buy

To buy a counter-depth refrigerator, consider budget-friendly regular models over pricier integrated or professional types.

Popular brands like GE, LG, and Bosch offer good options, with LG's Counter-Depth MAX French door model being a notable choice.

Professional refrigerators offer a distinct look contrasting with cabinetry, often in stainless-steel finishes, with brands like Sub-Zero, True, and BlueStar being top choices.

Integrated refrigerators, designed to blend with cabinetry, are best sourced from Thermador, Miele, Bosch, SKS, or Sub-Zero.

## Buy where you're comfortable

There are tons of stores and products, but a limited number of consumers. Check review sites like Yelp, CitySearch, Google and the Better Business Bureau before you purchase.

Remember, any store can sell an appliance; the biggest issues are shipping and service.

# Appliance Delivery Checklist

Our free checklist will help you avoid a delivery nightmare. At the end, you will know what to ask from your local, national, or box store appliance dealer.

Delivery is one of the biggest causes for your dissatisfaction. You need to be prepared.

In the Delivery Checklist you'll learn:

- How to choose a dealer with a first class delivery experience
- Which questions to ask to spot a quality delivery team
- The importance of online reviews to help your appliance search
